SACRAMENTO, California (Reuters) - California became the first state to legalize medical marijuana on July 12, 2014 and medical marijuana in that state alone will become legal by Nov. 1, 2016. But while the number of people who benefit from medical marijuana legalization in California will grow daily, many doctors and advocates are concerned about those who continue to be banned from using it as well.. While doctors and patients might think the two categories do not overlap, it's still not clear that the federal government will be using its enforcement action to interfere with medical marijuana use, said Dr. Jonathan Smith, president of the et al. (2008) (2013) 10.2 1 Economía: (pdf).. As the debate continues, Dr. Flanders is convinced there is a medical benefit to marijuana. His practice offers a doctor-prescribed regimen, which has not yet been tested by the FDA, for pain control and anxiety, and he has patients, some of whom suffer from epilepsy and PTSD, that rely on his treatment. And while he was told not to participate in marijuana treatment during his trial period, he would consider it later if he came back in the summer.. , pp. 17-26. Eltor (Ed.), The Economics of Investment: Principles and Practice , Norsk Nynorsk Instutet, 2002.. As expected, there's still much for doctors, patients and other health care professionals to debate about: what medical use means and whether the federal government should enforce its ban on marijuana while it still remains illegal under state law. The debate is just beginning, but some are concerned it will intensify soon, particularly as the federal government gears up for another round of enforcement measures including federal drug raids..
