Introduction The Antonov An-2 is a civilian version of the Soviet An-2 light cargo aircraft. It was developed from the An-2 "Produkt", but it is also the cargo version of the An-26 "Proton" aircraft. It was used for cargo transportation, police aviation, and as a transport for the Uralmash workers. Pilots or airline companies that have the need for a fast and agile cargo aircraft can use this aircraft for quick and long distance transportation. One of the aircraft, under Civil aviation management, had record of 2,965 flights between 1966 and 1995, flying with a total of 6,515,525 hours. Riding 82157476af
